

Pelican Delivery System

Saturated Solutions..

Prepared by
Saji Paul
Founder Director & CEO

Summary Pelican Delivery System

Pelican Delivery System is developed by Orion Informatics to manage Social Distancing in the wake of COVID 19 . This system is useful for Suppliers to make their customer order processing easier and customers can monitor their expenses in real time. Pelican Delivery System is available on both Web and Mobile platforms. Integrated to social media applications like WhatsApp as well. System could be integrated to any other application through web service to manage Accounting or Inventory . Pelican features include GST , Offer/Deal management, Home/Take away delivery Options, Online Payment / Cash on delivery .

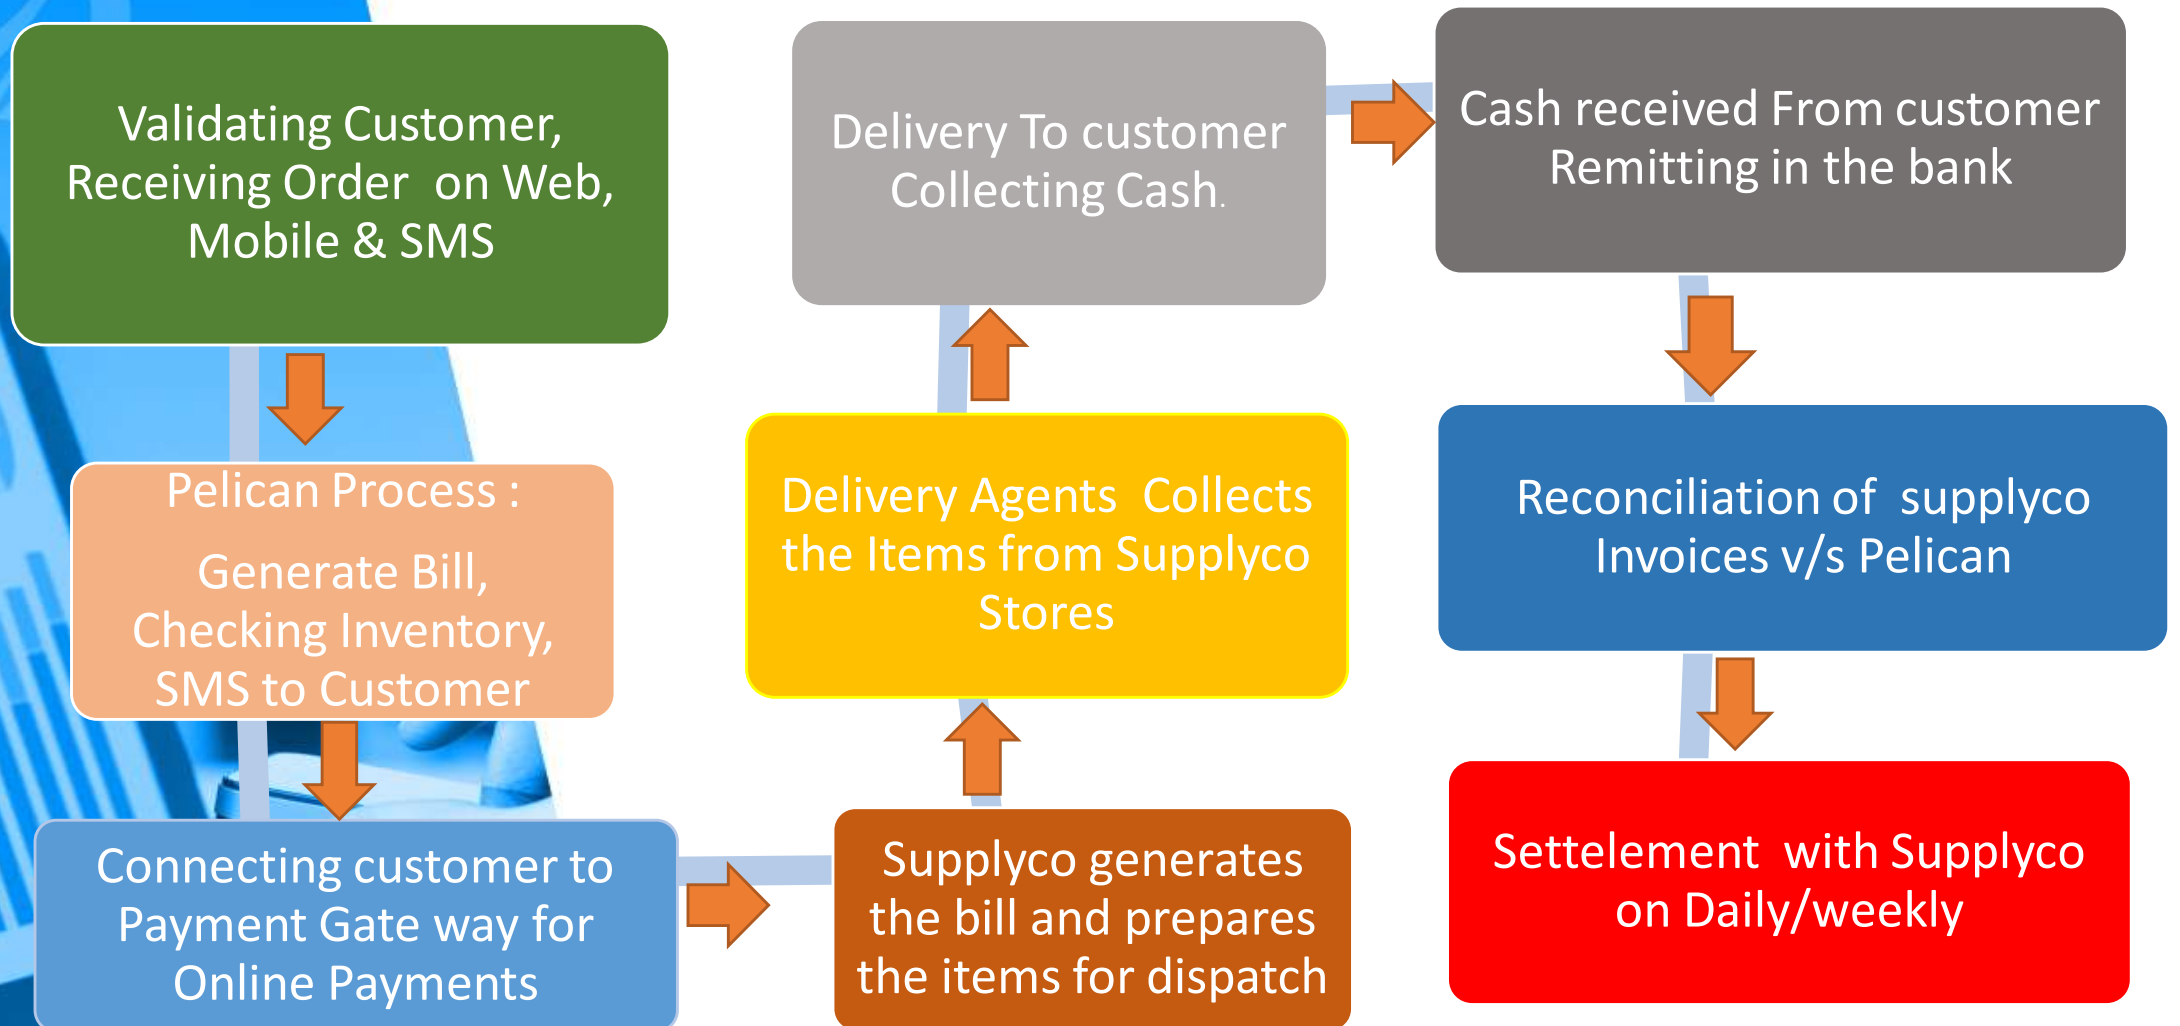

Features

- Order requests receives from Mobile App, Web , SMS and Whatsapp
- Admin user can Manage settings of the Order Processing like Adding new stock item , Update unavailability of Items , Modification of Items etc.
- Management can Monitor Department wise Store wise / District wise State wise Sales
- System can be Integrated with any external system like Inventory systems to check availability of stock, Accounting system for Posting of sales, supplier and Customer Details along with input and Output GST
- Separate Interface for Admins, Store users, district , State users
- Offers or Deals can be created Store wise/Product wise
- Home Delivery as well as Take away options available for customers
- Payment Gateway integrated for online Payments
